LoRaWAN™ LUMINAIRE CONTROLLER IP68 UL2011

LoRaWAN™ Luminaire Controller is a remote controlling device for LED and HID luminaries using 0...10V analog or DALI control signal.

Control commands from/to dedicated application are to be sent/received using LoRaWAN™ network.

OVERVIEW

Universal

Supports LED and HID luminaires.

APPLICATIONS

Luminaires control

Supports customisable dimming profiles together with various configurable inputs (light intensity, movement etc.).

Array control

Allows to control an array of 32 luminaires over the DALI interface

Auxiliary light control (optional)

Relay for auxiliary light control (decorative lighting etc.).

Power monitoring

Monitor used power and luminaire burn time

FEATURES

- DALI interface
- Relay control
- Luminaire intensity control
- Thermistor input
- Digital input (e.g. movement sensor)
- Analog input (e.g. reflected light level)
- Sensor power supply
- IP68
- Surge protection
- Power metering

SPECIFICATIONS

Length:	134.0 mm
Width:	54.0 mm
Depth:	33.0 mm
Weight:	ca 99 g
Operating temperature:	-30°C ... +60°C
Power consumption:	230V -15% .. +10% <1V A
Communication range:	up to 15 km* LoRaWAN™
Tx power:	up to +20 dBm
Rx Sensitivity:	-140 dBm
MAC Layer:	LoRaWAN™
Physical Layer:	LoRa®
Body material:	ABS
IP Rating:	IP68
Communication:	LoRaWAN™

* Communication range is dependent on the location of the sensor and nearest base station.

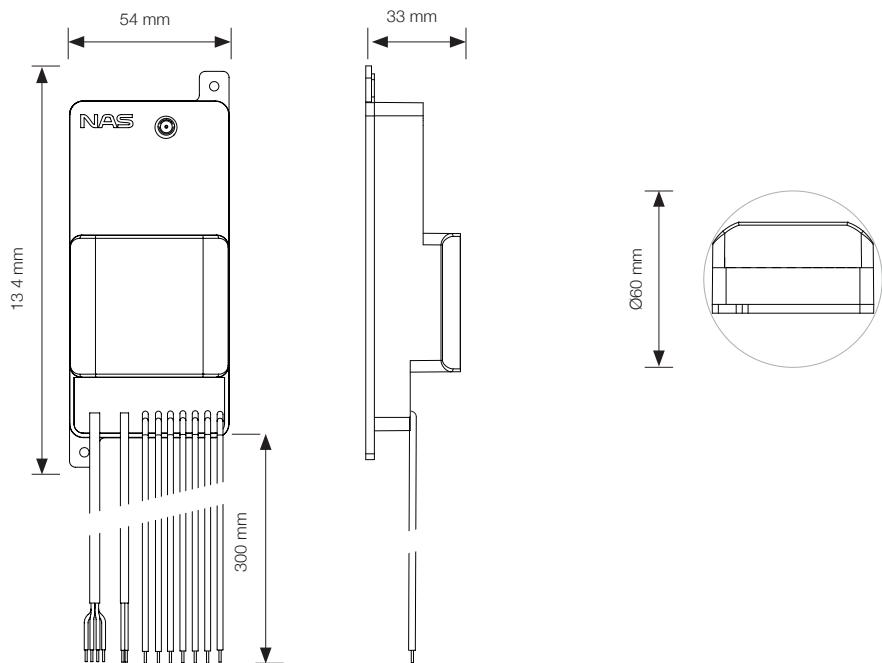

INTERFACE SPECIFICATIONS

Relay max current:	6A
Surge protection:	1500V (3000V on demand)
Intensity control output voltage:	0V .. 10V
DALI Interface max number of slaves:	32
Thermistor input:	12V tolerant
Digital input:	12V tolerant
Analog input:	12V tolerant*
AUX relay max current:	2A (optional)
External Sensor Power supply:	Output voltage: 12V Max output current: 50mA

* Not used together with optional AUX relay.

	6	FW	Parameter										Parameter									
	7	Relay 2	Parameter										Parameter									

* 0 value means that the controller has not received any packages

** Profile ID 255 is used when there is no active profile and the controller is manually controlled.

*** Profile sequence 255 is used when the current actual light level is not according to the profile configuration (e.g. it has been manually overwritten).

Answer for detailed DALI status request

1st Device status

Profile address in HEX

02

Profile HEX address converted to DALI address

Single device 1

DALI status in HEX

04

HEX value converted to status

Ballast is off

2nd Device status

Profile address in HEX

06

Profile HEX address converted to DALI address

Single device 3

DALI status in HEX

02

HEX value converted to status

Lamp is burned out

3rd Device status

Profile address in HEX

0C

Profile HEX address converted to DALI address

Single device 6

DALI status in HEX

02

HEX value converted to status

Lamp is burned out

Set Dimming level

Byte 0	Byte 1	Byte 2	Byte *	Byte *	Byte 9	Byte 10
Header	Addr.	Dim level	Addr.	Dim level	Addr.	Dim level
01	0..255	0..100	0..255	0..100	0..255	0..100

Message sample

Message goal: Set all luminaires to 100%

Header

Select Header HEX code

01

Destination address

Convert DALI Broadcast address to HEX

FE

Dimming level

Convert light dimming level 100% from decimal to HEX

64

Compile message for sending (HEX)

Custom DALI request

Byte 0	Byte 1	Byte 2	Byte *	Byte *	Byte 9	Byte 10
Header	Addr.	Query	Addr.	Query	Addr.	Query
03	0..255	0..255	0..255	0..255	0..255	0..255

Message sample

Message goal: Ask Max level, Min Level, Power on level, System failure level and Fade time/rate from device 36

Header

Select Header HEX code

03

1st Query

Destination address

Convert DALI single device 36 address to HEX

48

Convert Max level query code 161 to HEX

A1

2nd Query

Destination address

Convert DALI single device 36 address to HEX

48

Convert Min level query code 162 to HEX

A2

3rd Query

Destination address

Convert DALI single device 36 address to HEX

48

Convert Power on level query code 163 to HEX

A3

4th Query

Destination address

Convert DALI single device 36 address to HEX

48

Convert System failure level query code 164 to HEX

A4

5th Query

Destination address

Convert DALI single device 36 address to HEX

48

Convert Fade time/rate query code 165 to HEX

A5

Compile message for sending (HEX)

Answer for custom DALI request

1st Answer

Profile address in HEX

48

Profile HEX address converted to DALI address

Single device 36

Query in HEX

A1

HEX value converted to decimal

161

Decimal value translated to query

Max level

Answer in HEX

FE

HEX value converted to decimal

254

2nd Answer

Profile address in HEX

48

Profile HEX address converted to DALI address

Single device 36

Query in HEX

A2

HEX value converted to decimal

162

Decimal value translated to query

Min level

Answer in HEX

A8

HEX value converted to decimal

168

3rd Answer

Profile address in HEX

48

Profile HEX address converted to DALI address

Single device 36

Query in HEX

A3

HEX value converted to decimal

163

Decimal value translated to query

Power on level

Answer in HEX

FE

HEX value converted to decimal

254

4th Answer

Profile address in HEX

48

Profile HEX address converted to DALI address

Single device 36

Query in HEX

A4

HEX value converted to decimal

164

Decimal value translated to query

Failure level

Answer in HEX

FE

HEX value converted to decimal

254

5th Answer

Profile address in HEX

48

Profile HEX address converted to DALI address

Single device 36

Query in HEX

A5

HEX value converted to decimal

165

Decimal value translated to query

Fade time/rate

Answer in HEX

07

HEX value converted to status

<0.7s / 45 steps/s

Custom DALI command

WIRING

Amount of wires in each section is dependant of the ordered configuration

		Description
W1 - Wire 1:		
Brown		Normally closed or open AC 230V relay output to driver
Blue		230V AC neutral output to driver
Grey		DALI+ control signal to driver
Black		DALI- control signal to driver
W2 - Wire 3:		
Brown		AC 230V input
Blue		230V AC neutral input
G3 - Group 3		
White		0..10V+ control signal to driver
White/Blue		0..10V- control signal to driver
Red		+12V output for sensor powering
Pink		THR in
Yellow		LDR in
Green		DIG in
Red/Grey		Ground for DIG sensor

ORDERING INFORMATION

Product/SKU	Package qty	IP Rating
UL2011x#xx#0001xx	1	IP68

Article region	SKU region	Frequency
A	EU	868 MHz
B	AU	922 MHz
C	US	915 MHz
D	AS	923 MHz
E	CN	780 MHz
F	KR	922 MHz
G	EU	433 MHz
H	CN	470 MHz
I	IN	866 MHz

Model	Description	Optional features (Choose only 1 from each column)							
UL2011	DD - DALI only	M - Metering	T - THR	D - DIG	L - LDR O - Relay 2	F - fixed antenna P - wired antenna	S - extra surge protection	X* - custom request	
	DC - DALI & NC relay								
	DO - DALI & NO relay								
	AC - 0..10V & NC relay								
	AO - 0..10V & NO relay								
	UC - DALI & 0..10V & NC relay								
	UO - DALI & 0..10V & NO relay								
	UU - DALI & 0..10V & NC relay & NO relay								

* Custom request must be verified with sales before ordering. On order X must be accompanied with the description of agreed functionality.

REVISION HISTORY

- 1.0 - First version
- 1.1 - Added configuration details.
- 1.2 - Added configuration details.
- 1.3 - Updated communication protocol
- 1.4 - Wiring diagram and ordering information
- 1.5 - fw 0.5.0 support, power metering
- 2.0 - Split from ULw datasheet

All content contained herein is subject to change without notice. Nordic Automation Systems reserves the right to change or modify the content at any time.
