

LoRaWAN™ WM-Bus Bridge UM6000

LoRaWAN™ WM-Bus Bridge is designed for receiving wireless M-Bus signals from utility meters and forwarding them via LoRaWAN networks to the service provider.

OVERVIEW

Universal

LoRaWAN™ WM-Bus Bridge supports multiple WM-Bus Link modes.

APPLICATIONS

Remote reading

It creates a bridge between short range WM-Bus and LoRaWAN™, thus enabling remote reading of devices that are normally not remote readable.

FEATURES

- Long range wireless data transmission
- Grid powered
- Built-in antenna
- Configurable reporting interval
- Maintenance free - install & forget
- Easy installation
- Secure communication
- Supported WM-Bus link modes: S1, S1-m, S2, T1, T2, R2, C1 T-A, C2 T-A, C1 T-B, C2 T-B
- Supports upto 16 different devices

SPECIFICATIONS

Diameter:	110 mm
Height:	50 mm
Weight:	95 g
Operating temperature:	0°C ... +60°C
Communication range:	up to 15 km*
Tx power:	up to +20 dBm
Rx Sensitivity:	-142 dBm
MAC Layer:	LoRaWAN™
Physical Layer:	LoRa®
Socket:	"Europlug" Type C
Power consumption:	230V -15% .. +10% <1V A
Body material:	PA6
IP Rating:	IP
Communication:	LoRaWAN™

* Communication range is dependent on the location of the sensor and nearest base station.

COMMUNICATION

Bit order:	LSB
Usage reporting:	Unconfirmed messages
Status reporting:	Confirmed messages
